ABSTRACT OF THE DISCLOSURE

1. A hydrogenated ring-opening metathesis polymer which contains at least a structural unit [B] of the following general formula [3] and/or a structural unit [C] of the following general formula [4]:

[4]

[wherein, R⁸ to R¹¹ and R¹³ to R¹⁶ each independently represent a hydrogen atom or a linear, branched or cyclic alkyl group having 1 to 10 carbon atoms, and x²'s and x³'s may be the same or different and represent -O- or -CR¹²₂- (wherein, R¹² represents a hydrogen atom or a linear or branched alkyl group having 1 to 10 carbon atoms.). One of y¹ and y² represents -(C=O)- and the other of y¹ and y² represents -CR¹⁸₂- (wherein, R¹⁸ represents a hydrogen atom or a linear or branched alkyl group having 1 to 10 carbon atoms.). m and n represent an integer of 0 or 1 to 3.].
